Council Meeting

At the regular meeting of the local town council on Thursday night last, the mayor and all councillors were present.

The minutes of previous regular meeting and of meeting of Court of Revision were approved as read.

The following accounts were passed for payment: A. Morency \$168.65, W. A. Beebe \$39.00, J. Aschacher \$10.80, N. Weston \$7.20, West Canadian Collieries, \$761.45.

By Law 67, setting a mill rate for the town for 1920, received three readings and was finally passed. The rate set was 55 mills being 20 mills municipal general, 20 mills debenture, and 15 mills special. Ten percent discount will be allowed on current taxes paid on or before August 31st, 1920, and 5 per cent from September 1st to October 31st.

"Pal o' Mine" at Coleman Opera House

It is difficult to write restrainedly of a play like "Pal o' Mine," which comes to the Coleman opera house on Wednesday night next. There is no doubt that it is an uncommonly fine one, and that in the person of the author, William P. Springer, a man has come to the bad theatricalization of the American comedy who has a real idea of life, who is able to infuse that idea into living characters in words, music and song, and who has the courage to admit that in the declamations of human experiences two plus two equal four. "Pal o' Mine" is a story of New York, in which the figures walk, talk, sing and breathe like two-legged people. The technique, which comes only with constant writing for the stage, coupled with the fact that he has taken plain men and women to deal with, makes the value of Mr. Springer's comedy. A gift of insight into the depths of the soul of men and the power to set forth what he sees there, which he unquestionably has, is what makes "Pal o' Mine" such a wonder in success.

E. C. MacDonald, one-time druggist at Bellevue, was down from Calgary this week shaking hands with old Pass friends.

Minerals to the value of \$254,000, 000 have been produced since the discovery of silver at Cobalt in 1905, and dividends paid by the mining companies have aggregated \$99,537,321.

One of the best baseball games of the season was played at Coleman yesterday, in which Coleman defeated Cowley by one point. The teams were very evenly matched for the game.

The third international mining convention will be held at Nelson July 20 to 24. During the convention the foremost authorities will give addresses of absorbing interest. All the most up-to-date machinery and appliances for mining will be on view, and a tour of the Slovan, Silverton, New Denver, Sandon, Kaslo, and Alusworth country will be features.

NOTICE TO CREDITORS AND CLAIMANTS

In the matter of the Estate of Thomas Waklen, late of the Town of Coleman, in the Province of Alberta, Electrician, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the late Thomas Waklen, who died on or about the 29th day of March, A.D. 1920, are required to forward to J. E. Gillis, of Blairmore, Alberta, the undersigned Solicitor for the Administrator, Christina Waklen, on or before the 20th day of August, 1920, a full statement of their claims duly verified, and any "recipients" held by them, and after that date the Administrator will distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to her notice.

Dated this 14th day of July, A. D. 1920.

J. E. GILLIS,
Blairmore, Alberta,
Solicitor for the Administrator

Prohibition and Moonshine

An enormous growth in illicit stills since the advent of Prohibition is shown by figures read in the Senate by Sir James Esquith. They show that whereas in 1917 only 19 stills were discovered the number in 1919-20 had grown to 387. The province of Ontario showed the most progress along this line, the number of stills advancing from 50 in 1917 to 296 in 1919. New Brunswick which, (for quote Sir James) "was pure and undefiled" in 1917 was found to have eight stills in 1919. Nova Scotia advanced from 1 to 20. Prince Edward Island from none to one, Manitoba from none to 137, Alberta none to 210, Saskatchewan 15 to 135 and Quebec 11 to 1643. And how many hundreds of stills are in operation throughout the country the authorities know nothing of.

Frank Sanatorium Notes

We have received some very black looks since last week's notes were published. Our advice is: Don't wear the shoe if it doesn't fit.

Friend Brady had the sympathy of all last week, because of his inability to produce a fainting spell when, visions of a sort were hovering around. Tough luck, Brady, old boy!

Last week several of the inmates had that grand and glorious feeling. They got their transportation to Calgary to secure their discharge. Jimmy Crum had only one regret on leaving. He was sorry the long-promised picnic was again postponed.

The League lost a valuable and congenial worker when Mr. Denison bid us farewell on Friday last.

It has been noticeable that a very popular song amongst the sisters just now is "Somewhere a voice is calling." Last week the orderlies had a craze for the old favorite, "The Bells are Ringing." We urged the patients to start a run on "My Wild Days are Over" in the near future.

One of the boys was telling a tale about two girls who went for a tramp in the woods. We understand the tramp enjoyed it. Ned Brown maintains that some guys have all the luck.

The young couples who use the railway tracks as a lover's trail had better be careful what they say while passing the Sals, as the balmy summer breezes carry sound a long way. Last Sunday we heard some amorous swain offering to kiss his fair companion if she wouldn't tell us. Most old fellows are wearing light shoes these warm nights, so take a chance, old scout; maybe you can run faster than he. The same advice is offered the lady and gentleman who were arguing over some domestic dispute and calling each other some very endearing (?) names. There are some unsophisticated young men in this institution and it would never do for the people of the Pass to corrupt them during their stay among them.

A very interesting checker match was played on the west veranda last week between the San champion and the Frank postmaster, who was coaxed out of his retirement by J. Tindall. Our elongated friend, St. Peter, won alright, but it may interest his opponent to know that he suffered from a severe headache in consequence. Better try again, Mr. Wilson. We notice that Jimmy Tindall has a bad habit of disappearing whenever he sees his would-be champions are getting the best of the argument. Sick it out, Jimmy, and don't leave all your friends talking to themselves as they leave.

Last Saturday evening friend McLeod caused some excitement. When taking his temperature, it seems he shook the wrong end and sent it off instead of down. As he had just come in from the spring, we wonder if his thoughts were still wandering around there. Better come to earth once in a while Mac.

NOSUBSCRIBE.

Drs. Bonnell and Garner, with their families, visited Blairmore yesterday and incidentally did rooting for the baseball games at Blairmore and Coleman.

P. M. Christophers, organizer for the O. B. U., who was taken across the international line near Estevan, Saskatchewan, but succeeded in recovering Canadian ground in short time thereafter, arrived in Blairmore last week end, none the worse for his kidnapping experience.

ROYAL YEAST CAKES

Royal Yeast has been the standard yeast in Canada, for over 50 years, and it is a well known fact that bread made with Royal Yeast possesses a greater amount of nourishment than that made with any other.

Co-Operation in Industry

Although sharp differences of opinion may exist throughout Canada as to the methods to be employed to promote the prosperity and development of industry in this Dominion, people are a unit in desiring to see the natural resources of this country developed to their fullest degree for the use and benefit of our own people and in order to enlarge the export trade of Canada.

No thinking man or woman is antagonistic to the building up of great manufacturing industries in Canada; on the contrary, everybody welcomes them, is anxious to see them prosper, and is prepared to do everything within reason to assist their growth in the common interests of all and for the welfare of the Dominion. Opinions may and do differ as to the policies and methods to be adopted to that end, and these are properly open to debate, but it is almost universally recognized and accepted that the primary means to be employed should be scientific and vigorous development of Canada's latent wealth in natural resources of all kinds.

Manufacturers, workingmen and consumers alike stand to benefit greatly through the development for use of those natural resources of wealth which the several provinces abound. For example, it is a source of national strength and of benefit to all people that, as one propagandist for the great manufacturing interests recently pointed out, Canada should have a great match-making industry. Such an industry calls for the use of many natural products of Canada, gives employment to hundreds of men and women, and to the extent that it supplies the home market and adds to the export trade of Canada, adds to the national strength and financial stability of the country. Our people should welcome and support such industries.

But it is in the interests of all manufacturing industries as well as in the interests of transportation, business generally, and the whole body of the consuming public that the basic industries should receive first and foremost attention, such an industry, for example, as coal mining. Without adequate supply of coal at reasonable prices all manufacturing industry, transportation and commerce would be seriously crippled, if, indeed, not brought to a standstill.

Canada has abundant coal deposits, yet this country has for generations imported coal to the extent of tens of millions of tons annually, thus adding to the adverse balance of trade, while our own mines have languished and employment in their development been denied to our people. Now, owing to conditions over which this country has no control, it has become a matter of dire necessity that our people should secure their coal requirements largely at home. Here in the West we must rely almost exclusively this fall and winter upon the output of our western mines, yet, because the lack of development in the past it will be difficult for them to meet the heavy demands so suddenly thrust upon them.

In past years these mines have frequently been idle during the summer

months, because there was no immediate demand for coal, and because much of it is of a class that cannot be stored in the open, subject to the weather conditions. It must be stored under cover. This has resulted in labor dissatisfaction, because of "lay-offs" at the mines, and the operators have had great difficulty in maintaining full and efficient staffs of workers. Such a condition has also added to the transportation problem, inasmuch as the eastbound coal movement from the Alberta mines to Saskatchewan and Manitoba has come at the same period of the year as the heavy movement of grain from the prairies to the head of the lakes. In other words the two heaviest freight movements have come together, and both have called for transportation in the same direction—from east to west. If one moved west and the other east, the transportation problem would be simple, but two heavy freight movements in one direction means a return of long trains of empty cars the other way, thus adding enormously to transportation costs which the people have to pay.

Future provision must be made for the transportation and storage of Western coal during the summer months before the grain movement begins in the fall if dangers of grain blockades or an acute coal shortage in severe weather are to be avoided. It is too late to do much in this direction this year, but the people can help very materially and in a simple and thoroughly practical manner by buying their winter's requirements of coal and taking delivery of it into their cellars, which are the chief existing places of storage now. A heavy movement of coal in the West during the next six or eight weeks will assist enormously in reducing the costs, preventing grain blockades with a bumper crop in prospect, providing against a coal shortage with its resultant inconvenience and suffering, and largely solve the big transportation problem which otherwise will cripple this country during the coming fall and winter.

To Hold Court at Chesterfield Inlet

For the first time in Canadian history, court will be held at Chesterfield Inlet, when Quanguag, alleged murderer of two kinsmen, will be tried. The Eskimo was brought to Winnipeg by Sergt. W. O. Douglas, of the Royal Canadian Mounted Police, who will take him to Chesterfield Inlet, sailing from Montreal.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer. In most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. There are dealers in every town, or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Frenchman Inventor Of Poison Gas

Proof Sustained in Original Documents. Dated April 1865. That a Swiss lieutenant 250 years ago invented asphyxiating gas for the French army, is the claim advanced by the French press supported by historic documents, proving that so far as war is concerned there really is nothing new under the sun.

The Ministry of Foreign Affairs contains the original documents dated April 1865, signed by Dupre, French Consul at Geneva, attributing the discovery to the Sieur Dorchat of Sie Valais, then serving the French King at the Canton of Fribourg. According to Dorchat's claims, he was able in four hours at a minimum expense, to prepare a liquid giving off a gas so thick and of such disagreeable odor that it was impossible for human beings to remain in its proximity.

The gas bomb is no new invention, for Dorchat had perfected a method of throwing containers from a cannon, even exceeding modern gas agents by devising a cartridge or tube to be fired from an ordinary army pistol. The official records, however, fail to show whether the great Louis investigated Dorchat's discovery, but military experts of today point out that the letters were mentioned 14 years ago in a volume published by the Swiss Consul in Belgium and probably prompted German experts of fightfulness to investigate the possibilities of adopting gas in warfare.

Birds That Cannot Fly

Wings of Barnyard Fowls Have Become Useless for Flying. Why don't barnyard fowls fly? They can make a fluttering pretence at flight, it is true, but for real flying their wings are useless. Barnyard fowls have lost the use of their wings through neglecting to use them. They have been valued for their eggs, and, as a consequence, they have been well fed. Thus the necessity for flying from place to place in search of food has not existed. They have for the same reason been protected as far as possible from attack by animals and from other dangers that would make flight, as a means of escape, a necessity. In course of time, therefore, their wings have become practically useless for purposes of flight. The wings of barnyard fowl are gradually decreasing in size. It may be in the course of time their wings will be nothing more than mere stumps, and later still it is quite possible that they will disappear altogether.

IT CURES CATARRH BRONCHITIS

You don't have to wait for relief when you use Catarrh-ozone.

This wonderful inhaler treatment is guaranteed to cure any case of Catarrh, no matter how chronic. You breathe through this inhaler and in so doing you send all through your breathing organs a powerful vapor that is full of soothing, healing, germ-destroying properties. In this way the seeds of Catarrh are destroyed. Sore throats and weak throat are cured. Coughing, hard breathing, and sneezing all stop. For the cure use only Catarrh-ozone. Refuse substitutes. Two months' treatment (including the inhaler) price \$100. Small size 50c, at all dealers, or The Catarrh-ozone Co., Kingston, Ont., Canada.

Canada's Need

Resources Only Need to be Developed in Order to Enrich This Country.

"What is the need of Canada at the present time? We have a great debt in this country. How are we going to meet it? We are told to produce. We can produce the raw materials, on the land, and in the mines of this country. We have great natural resources that only need to be developed in order to enrich this country; and if we can only develop those resources to the extent of one-fourth of their value at the present time we would have no trouble in meeting our obligations as a nation. There is no cause for any person in this country to be discouraged about the future of Canada. All we need to do is to move around this Dominion to realize the great resources we possess; and we cannot help but become prouder of our country and cannot help but glory in the fact that, in Canada, we have as great wealth and as great opportunities as are to be found in any land in the world today. What is requisite is to encourage the development of those resources, and, given an opportunity to the people to take advantage of the wealth that is in the country there will be no need for the government to worry about the future of Canada and no need for the honest, capable and ambitious citizen of Canada to worry about it either."—W. A. Buchanan, M.P., in the House of Commons.

The Danube river flows through countries in which 52 languages and dialects are spoken. Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other agents, may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Open Timber Exhibition

Canada Has Attractive Display At Kensington

Prince Arthur of Connaught, opened the Empire Timber Exhibition at Kensington, promoted by the governmental department of overseas trade with the object of bringing into more universal use the timber grown in the Empire.

The promoters give a special word of praise to the Canadian forestry laboratories at Montreal. Canada has a fairly extensive, and well staged exhibit, and a few Canadian firms have individual displays.

The exhibition is of a purely technical character, intended to attract traders. The official catalogue which contains a list of shippers, importers, etc., will doubtless prove useful to specialists in the timber industry.

Farmers and Automobiles

Practically 50 percent of all the motor cars built are sold to farmers. The sales of motor trucks to farmers are fast reaching that high mark, for the trucks afford the means to save money, not only in transporting farm products to market and getting better prices, but in cutting down the farmer's overhead expenses.

Minard's Liniment Relieves Distemper.

Pershing Receives Jewelled Sword

Sir Auckland Geddes Presents Gift From City of London

Great Britain does not forget those who prove themselves its friends in the hour of need. Sir Auckland Geddes, British ambassador to the United States, told General Pershing, in presenting him with a jewelled sword as a gift from the City of London. The presentation was made at the British embassy.

Commenting on the celebration of the independence of the United States "wring from an autocratic government by the spirit of individual freedom as in many lands," Sir Auckland recalled that in those days, there were many on both sides of the Atlantic Ocean who thought the action of the framers of your constitution right.

"There is none now, I believe, on either side of the Atlantic," he said, "who does not see the deep significance of the gift. We are all of English stock, the memories of Rummey are a possession of all your people as they are living memory and possession of all the British people."

General Pershing, accepted the sword "in the name of the men of the United States, who, with the men of Great Britain and the other allies, combined the courage and skill that brought a new victory to our race, and to all these who seek justice and liberty for mankind."

I fell from a building and received what the doctor called a very bad cold, and, told me I was not to walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was well again. I think it is the best liniment made. ARCHIE E. LAUNDREY, Edmonton.

Sumatra Protects Tigers

Tigers are protected in Sumatra, the reason being that one of the important industries of that country is the cultivation of an African palm. This palm was introduced several years ago, and the wild hogs so enjoyed its easily obtained fruits and so thrived on them that they increased and multiplied rapidly until they became a perfect pest. Now, wild hogs are the favorite diet of Sumatran tigers, therefore the protection. But it looks like a dangerous experiment.

England to Grow Square Trees

Not with any desire of giving publicity to the designs of that curious class of artists, called cubists, but with the entire laudatory ambition of avoiding waste, the Cambridge Forestry Association, of Cambridge, England, suggests that trees should be made to grow square instead of round, thus producing wood of better quality and in greater quantity. Will the leaves, flowers and fruit of such trees be square also, one wonders?

Holland is covered with willow trees, and the great dykes of the country are made stronger by the network formed by the roots.

When the weather is fine and the sea calm, reefs frequently close floating behind their backs in the water.

Much Loss is Incurred in Summer Months Through Placing Fertile Eggs on the Market

The presence of male birds in the flock during the summer months has a decidedly detrimental effect upon the quality of eggs and poultry producers lose many thousands of dollars annually through the presence of partially incubated and bad eggs in the produce they market. Reports are now being received from all parts of the country of the number of partially incubated eggs appearing in current receipts. Producers do not realize that it is unnecessary for a fertile egg to be placed under a broody hen to cause the germ to grow; a temperature of seventy degrees is sufficient to start incubation. If the heat is constant the development of the chick will continue, but if it ceases or is intermittent, putrefaction at once sets in, and the egg becomes bad. Such eggs have no place or value in shipments, and should they get to the consumer the consumptive demand immediately falls off.

The male bird is not essential in egg production, his usefulness is over when the supply of fertile eggs for the season has been secured. The hens will lay just as many eggs when the male bird has been removed and the eggs will be more suitable for consumption, packing or storing. Further, there is a distinct financial gain to the producer who markets infertile eggs, because the better trade in many cities offer a premium of from one to five cents a dozen for infertile eggs.

Then there is the question of feed. It costs money to feed poultry, and with feed at its present value, the consumption of feed by males kept for no particular purpose is a serious economic waste. The reason for this is that the best price for live and dressed fowl prevail in the spring and early summer. During the summer the price declines, and by the early

Canadian Polishes, Limited, Hamilton - Ont.

fall when many producers decide to market their male birds a lower price than prevailed in the spring has to be accepted; the producer thus losing the amount per pound the market has declined, plus the value of the feed consumed by the birds during the summer months. This financial loss takes on a more serious aspect when it is coupled with the amount charged back by the wholesaler for the bad and partially incubated eggs that have been marketed.

Farmers and others selling eggs for market should therefore need no urging to kill off, dispose of, or at least remove the male birds from the flock after the breeding season.

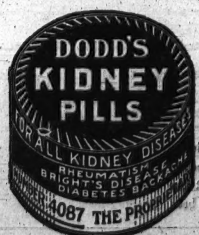

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

Sinn Fein Court Orders Suppression Of All Information

Dublin.—The Dublin county court has instructed its officials not to supply any information to the British Income tax authorities nor to allow these authorities to examine books or documents. "The Irish Republican Parliament" issued these instructions through the self-styled court.

Sinn Fein executive in Cork has circulated among the Cork men a similar warning not to furnish income tax information, adding: "Any breach of this order will be severely dealt with."

The situation in the west and south is so serious owing to the stoppage of trains, that many towns are adopting a rationing system as a precaution.

Londonderry, Ireland.—An atmosphere filled with ominous forebodings prevails here. It will surprise no one if the civil warfare that terrorized this city for more than a week recently, broke into fresh flame at any moment. Nationalists, who in the recent struggle were finally forced to yield to the armed weight of the government troops, now seem all prepared for new war.

Sandbags and barbed-wire fences are being erected in the main thoroughfares.

Russian Peace Needed

British Labor Delegation Declares Continuation of Blockade Is Madness

London.—The British Labor delegation which recently returned from Russia, has issued an interim report. It declares there is urgent need for immediate peace with Russia and that persistence in the policy of blockade and intervention is madness and criminal folly which can only end in European disaster.

Emphasizing Russia's economic and transport difficulties and the absorption of her efforts in military activities, the report says: "Ringed from the world by a blockade of all powerful nations, attacked by enemies from within and without, and menaced by fear of counter-revolutions, from within, it is wondered that a revolutionary government which has maintained any kind of order and discipline amongst its peoples, has failed to its support practically the whole Russian nation."

Voice Across the Sea

Wireless Telephone to Join Newfoundland and England

St. John's, Nfld.—Preparations are being made at the historic Signal Hill for establishment of communication between Newfoundland and Great Britain by wireless telephone. The feat of speaking across the Atlantic by wireless telephone has already been accomplished, connection having been established between London on the one side and Glace Bay, C.B., the Marconi headquarters, on the other. But in the present instance, it is planned to make the scheme much more extensive. The real purpose of the activities of the Marconi Company is to give a demonstration to the old world members of the press conference, who will shortly be out this way to join the Dominion members in Canada for a two months' tour of that country.

The object is to have the steamer Victorian, on which the press men are coming across, in constant communication with the land on either side from the day they leave Liverpool till they arrive in Halifax, and for this purpose a station is being equipped on the Cornwall tower in England, second at Cabot Tower, Signal Hill, St. John's, and the third on the Victorian.

Villa May Surrender

Mexican Rebel Has Signed Armistice And Agrees to Cease Making Trouble

El Paso, Tex.—A despatch to the El Paso Times from its correspondent in Torreon, Mexico, says Francisco Villa has signed an armistice and agreed to cease attacks on torreon and towns.

The rebel chieftain has also agreed to surrender, under certain conditions to be approved by Provisional President De La Huerta.

W. N. U. 1324

Good Crop Prospects Throughout Manitoba

Provincial Agricultural Department Issues Encouraging Report

Winnipeg.—On the whole the crop outlook in Manitoba is very encouraging, says an official report given out by the provincial department of agriculture. It is stated that reports from probably 50 percent of points are entirely satisfactory, while from others there is some word of lack of recent rains. There is no suggestion of crop failure, however, and indications run from "fair to good." Many early wheat fields are headed or heading. A fairly early harvest is expected. Grasshoppers have been successfully fought with poison, though they continue their work in some districts.

Garnering U.S. Crop

100,000 Men Are Moving North Through the Wheat Belt

Washington.—A land army of 100,000 farm hands organized by the department of agriculture is moving northward across the western wheat belt harvesting the United States grain crop in better time than in many years, according to reports to the department.

For the first time in years farmers have not been handicapped through the labor shortage, Dr. Taylor, of the farm bureau said. A wage of \$7 for a ten-hour day is being paid the harvesters.

Canadians Honored For Bravery

London.—The list of awards of the medal of the British Empire Order, just published, contains the names of the following Canadians: Charles Norman Barclay, Eva Grace Curtis Marshall, Emory McQuoid, Reginald Moncrieff, Gilbert Murray, George Patterson, Clare Savage, all for conspicuous bravery at explosives factories in Canada.

News of the Provinces

SASKATCHEWAN

What is believed to be the most favorable crop report ever issued by the Department of Agriculture was given out last week. It comprises reports from 50 points representative of the whole province, and every locality testifies to the healthy state of the crops and the abundance of moisture.

Regina.—The city is considering with the United Hotel Company, the erection of a new hotel to cost \$300,000. A committee of the Board of Trade has approved the proposals, and an effort is being made to raise the necessary capital.

Saskatoon.—The total number of big game animals shot under license in Saskatchewan in 1919 was 1,820 divided as follows: Moose, 1,101; deer, 661; caribou, 64.

Swift Current.—Further work has been done in connection with the project to irrigate a portion of southwestern Saskatchewan embracing 125,000 acres. The irrigated district will now probably reach the Weyburn-Lethbridge line of the C. P. R. and take in country north of Consul Vidora and Robart.

ALBERTA

Edmonton.—Showers and general rainfall throughout the greater portion of the province during the past week has further assisted the growth of crops. Wheat in many localities is over 12 inches high and timothy, alfalfa, and garden produce are making excellent progress.

Edmonton.—Since the beginning of the year Alberta government employment bureaus have placed over 20,000 men and women in positions. Last month, out of 6,141 applications from men and 1,796 from women, they were successful in placing 5,480 men and 1,635 women.

Calgary.—The Pope Lease, comprising one of the finest pieces of agricultural land in the province, and containing 15,000 acres will shortly be opened for soldier settlement. More than 100 applications have already been received and the parcels of land will be disposed of by ballot.

Gleichen.—Hospitality after the western flavor will be accorded the British press men on their Canadian tour when they reach Alberta. Here the two special trains will be greeted by a band of 500 Blackfoot.

Dipping in Mange Affected Areas

Ottawa Reports That Alberta and Saskatchewan Farmers Are Assailed in Western

Ottawa.—The first stage of the compulsory dipping order for cattle in mange-affected areas in Southern Alberta and Southwestern Saskatchewan has been completed, according to news received from Dr. George Hilton, chief veterinary inspector of the Dominion, who is supervising the move by which the federal department of agriculture hopes to practically eliminate mange within the next six or eight weeks.

All cattle in the area designated were ordered to be dipped, and work started on June 24, the total number of vats used being 88. Within a few days, twelve more had been added. Dr. Hargrave, of Medicine Hat, who is assisting with the work, reported that practically every stock owner had given the department their fullest co-operation. Range riders engaged by the department covered the territory to see that stragglers were brought in behind the general round-up.

The second dip has commenced, and it is hoped to complete it by July 15, when statistics on the number of animals treated will be available.

Canadian Beef on U. S. Market

New York.—High prices of beef in New York have attracted heavy shipments of Canadian fresh beef, the Evening World says in a special article dealing with the decline, compared with the prices a week ago. The arrival of these shipments from Canada, the newspaper says, have curtailed the practice of short shipping to New York and making the New York market a "price model" for the United States.

Help for Poland

Spa.—A member of the Polish delegation said that Marshal Foch, Field-Marshal Wilson were considering the question of military aid for Poland.

MANITOBA

Winnipeg.—A sheaf of winter rye just cut with the mower was brought into the city by a farmer from Birds-kill. It was fully headed out and in bloom, and measured 38 inches. This seed was sown in October last.

Brandon.—Great interest, even surpassing that of previous years, has been evinced at the tour of the Better Farming Train, throughout the western provinces. The average daily attendance at exhibits, demonstrations and lectures, has been in excess of twelve hundred.

Niverville.—J. S. Laidlaw, who is governing him for the Canadian Fibre Products Company, incorporated with a capital of \$1,000,000, has exhibited some fine samples of this year's production, and states that prospects of a good crop are excellent.

BRITISH COLUMBIA

Victoria.—Investigation will be commenced immediately with a view to establishing a steel plant in British Columbia, according to a statement made by the chairman of the board of directors of the Canadian Collieries, Ltd. He has just returned from Brazil, Paris, and London, and has been discussing a number of steel and financial men to investigate the steel possibilities of the province.

Vancouver.—The value of fish that were caught in British Columbia waters during the first three months of the year amounts to 1,320,888, leading all the provinces of the Dominion. This revenue was derived from 17 varieties of fish out of a total of 38 edible species that are found in quantities on the Pacific Coast.

Victoria.—The manufacture of calcium carbide at various points throughout the province is being advocated here. This material, which is manufactured from limestone and coke by subjection to heat in an electric furnace, is used for the production of acetylene gas, as a substitute for gasoline, and for certain chemical purposes. One ton of calcium carbide is obtained from 4,000 lbs. of the material.

Crop Handling To be Discussed At Conference

DECISION IS UPHELD IN CASE OF GEN. DYER

Held Responsible For Firing on Indian Crowd, and Put On Half Pay List

London.—The army council, after having considered a report of the Hunter investigation committee, and a long statement submitted by Brigadier-General R. E. H. Dyer, concerning Dyer's action in ordering troops to fire into a crowd of Indians at Amritsar, in the Punjab, upheld the commander-in-chief in India for removing Dyer as commander in the Punjab and from holding any further position in India, according to an announcement made by Winston Spencer Churchill, secretary for war, in the house of commons. The council also upheld the commander-in-chief in declining to grant Dyer further promotion and his reduction in pay one half.

"Dyer cannot be acquitted by any judgment," observed Mr. Churchill. Several hundred persons were killed when the troops fired on the Indians at Amritsar last April and many hundreds were wounded.

The house of commons was greatly excited over the statement by Mr. Churchill that the army council had agreed with the decision of the Indian authorities, condemning General Dyer for firing on the meeting of native at Amritsar and declaring that he must not be further employed.

Vigorous protests were raised and cries of "shame." The house is now dealing with the budget proposals in the finance bill. The chancellor has stuck to his guns against the 5 percent reduction in sparkling wines to 33-1-3 percent.

Siberian Coast Held by Japan

No Possible Terminal Is Left to the Russian Railways

Washington.—Posselt Bay, last of the first-rate harbors on the Asiatic coast north of Port Arthur remaining in possession of Russia, has passed into the hands of Japan, according to official advice received here, which reported occupation of the town by Japanese troops. The harbor of Posselt Bay, 75 miles southwest of Vladivostok and part of Russian Siberia, was considered for a time by Russia as the logical terminal of the trans-Siberian railroad in preference to Vladivostok on account of the excellent facilities offered by its natural position.

Possession of the bay, together with other ports occupied by the Japanese this year on the Asiatic coast, according to official advice, gives Japan not only all salt water terminals of the Manchurian and Siberian railways, but every possible future terminal.

Against Alliance

China Opposed to Renewal of Japanese Pact

Shanghai.—Sir Belby F. Alston, British Minister to China, has reached this city on his way to England, having been given a leave of absence. He is taking with him a petition to the British government presented to him here by a score of leading Chinese student bodies, opposing a renewal of the Anglo-Japanese treaty. The document says the conditions which led to the negotiating of the treaty no longer exist, and declares the danger from Russia and Germany has been removed. The United States, it asserts, is the only power with strength sufficient to endanger peace, and "it is unthinkable that that country would alter its established policy overnight."

Press Delegates Delayed

Montreal.—Word has been received that the British delegates to the Imperial Press Conference, to be held at Ottawa in August, will be three days late in landing. The party, passengers on the Steamer Victorian, will now arrive at Sydney, N.S., and not at Halifax as formerly planned.

Winnipeg.—The whole question of wheat trading in Canada, in view of the announcement of the opening of the United States grain exchanges on July 15, is under careful consideration by the council of the Winnipeg Grain Exchange, according to a statement of J. E. Botterell, president.

All branches of the grain and flour trades were being invited to send representatives to a conference with the executive committee of the Grain Exchange at an early date for the purpose of determining the conditions under which the machinery of the Grain Exchange could best be put at the service of the country for the handling of the 1920 wheat crop," said Mr. Botterell, "therefore the Winnipeg Grain Exchange is proceeding energetically with plans for the safe and efficient handling of the Canadian crop for which the prospects at present are so favorable."

Resignation of Premier Goun

After Fifteen Years in Office, Feels That He Can Condo Work To Other Hands

Quebec.—At a cabinet meeting Sir Lomer Gouin tendered his formal resignation as premier of the province. No announcements have been made as in regard to his successor or other cabinet changes. The official statement of the retiring premier, in part, is as follows:

"During fifteen years I have had the signal honor of enjoying the most complete confidence of our people. I feel that I should now confide to other hands the work of peace, concord and prosperity, which the Liberal party has striven to accomplish in this province since 1897."

"Thanks to the harmony that reigns among all the groups of our population, and to their intelligent and effective collaboration, our province is developing rapidly, and already occupies a very enviable position in the Dominion. I have an unshakable faith in the great future that attends it."

"The ambition of my life has been to merit the confidence of my fellow citizens, and in taking leave of them as prime minister, to think that I have been worthy of that confidence."

Shipowners and Seamen Disagree

Clash Occurs in Genoa Convention—British Sailor Predicts Revolution

Genoa.—Representatives of the seamen and shipowners clashed at the international seamen's conference, when Gilbert Law, representing the British Shipowners, presented an amendment providing that the "eight-hour day and 48-hour week" be applied only when vessels are in port.

Mr. Law said: "The 48-hour week meant destruction of the mercantile marine, which is the greatest asset of the British Empire, and raised the black flag of discontent." A representative of the British seamen naively replied asserting that shipowners had been the greatest exploiters and had gained millions during the war.

"If you do not treat seamen as they deserve, it is not a question of the black flag, but of the red flag of revolution," he declared. This was applauded by the seamen's delegates.

Salary Arrears for Civil Servants

Back Pay for Fifteen Months Will be Given in Two Weeks

Ottawa.—Back pay checks for fifteen months will be paid to civil servants in the next two weeks. The total amount, according to an announcement in the house of commons will be about \$4,000,000, that being the estimated cost of ante dating the civil service classifications.

The individual amounts paid will be the difference between a civil servant's former salary and that awarded him by the classification schedules. It is possible that two checks will be issued for each person, one covering the year from April 1, 1919, to April 1, 1920, and the other for April May and June 1920.

About 45,000 checks will be sent out from the auditor-general's department.

Life-Saving in Mines

How Colliers are Trained in England

The miner's rescue station means to the coal-miner what the fire-station means to a city like London. Trained staffs, and all the latest apparatus for rescue work, are always in waiting to answer a call of distress. Fast and powerful motor rescue vans stand ready at the station for instant dispatch, and are as complete for their duty as the fire engines.

Each colliery must have its trained team of five rescue workers for every 250 men working underground. Such is the regulation, but coal owners go much farther than is ordained by the law's letter. Colliers of a district combine forces, so that if any mine suffers an accident a large body of rescuers will be rushed to the scene from all neighboring pits. Thus, in a typical Yorkshire mining district a station at Doncaster serves a large group of the new collieries of that rich coalfield, and there are four trained teams of six men in each colliery.

If an alarm were given, the notices of the station, with apparatus and experts, would be on the spot in a few minutes. All the officials of mine would be at once notified, and doctors, infirmaries, and mine chemists. The teams would be rounded up, and well within three-quarters of an hour there should be about a hundred and fifty rescuers down the mine, all picked men, thoroughly trained and physically fit for strenuous exertion and prepared to work in poisonous gases.

A station magnificently equipped, like Doncaster's, costs the coal-owners who support it much money, but they spare no expense to make it perfect, to staff it with experts, and to employ the foremost scientific advisers to carry out research work. If the law says one motor must be kept at the station, two are provided. The necessary number of safety appliances is doubled, though each set of apparatus for use in poisonous air costs £20. And all the apparatus at the station will be scrapped at the moment when better kinds can be produced. Experiments go on ceaselessly for improving apparatus. To train rescue teams is also expensive work. But all work done in laboratories and stations is a good insurance against accident.

A SEVERE COURSE

Marvellous things have been done of late to make collieries safe, and many accidents would have been averted in the past if the modern research work could have borne earlier fruit.

Men who report to the station for training are given a very severe grueling. The course is intended to be more arduous than actual rescue work. Some of it takes place down in the pits, and some practices are at the station, which is fitted with a realistic representation of the scenes presented by a gas-wrecked coal-mine. All men trained are physi-

cally perfect, and they are well rewarded. They are given a day's pay for each practice, and refreshments, and may enjoy a luxurious shower-bath at the end of each three-hour course. They take the course in spare time, after working at the mine. Each trained man is paid fees and allowances which amount to about £10 a year.

The first thing is to master the complications of the breathing apparatus for use in poisonous air. This is a bag, with a mouth-piece supplying oxygen, allowing a man to work at high pressure for a spell of two hours. He tumbles in, and out of the bag, the air expired from his lungs being purified. Though the apparatus weighs forty pounds it is quite comfortable, and the wearer's head and eyes are left free. A gilly, prevents him breathing through his nose, and he will wear goggles in smoke.

Putting on this bag-of-tricks, a man begins a course of work in heat, in smoke, and in poisonous air which will qualify him to face the worst disaster with coolness.

REALISTIC WORK

In a low, narrow gallery full of sulphurous fumes he is set at hand labor, building ladders of sandbags or bricks. Mounting a stationary cycle with brakes on the back wheel (an instrument of torture called an ergometer) he pedals away until he can develop 4,000 foot-pounds of energy a minute. He is told off, dressed in breathing apparatus, to walk for two hours at a stretch without stopping, at four miles an hour. Or he is given some task in a gas chamber, which may be heated to 150 degrees F., or filled with steam, or poisonous coal-gas.

The station is always musical with the songs of a number of canaries who are ready to play a tumble lute heroic part in the training, and are ready also for duty in a mine after an explosion. A canary is by twenty times more sensitive to gas than a man. These perky birds would take birds alive in cages, and would know when they had reached poisonous air by the birds falling from their perch. In the Doncaster station they use a human cage, and the canaries which have to face gas with the men in training are revived by oxygen from a little cylinder fitted to the cage; thereafter singing as merrily as ever.

The effect on the men of breathing oxygen for two hours on end is chiefly to make them ravenously hungry. One giant of a collier undergoing training told the writer that after his bath and a meal at the rescue station he goes forth and eats three dinners on the way home.

The new curate was to preach his first sermon, so naturally he was very desirous of looking his best. Arriving at the station, he found to his chagrin that it contained no mirror, so seeking the sexton, an old Scotsman, he asked in low and nervous tones: "Er, James, can I—that is, do you think you could get me a glass?" With a shake of his head, James disappeared, returning in a few minutes carrying something under his coat. Withdrawing his hand he brought to light a large black bottle which he presented to the curate, saying at the same time: "Ye naught to do about it, for I got it as a special favor, an' 'wadn' ha' got it at all if I hadn't told 'em for you."

Had church service been held on the golf course on Sunday evening last, the largest congregation in the history of the Crows' Nest Pass could have been lectured to.

6 per cent.
InterestGOLD
BONDS

The Province of Alberta Offers

- To those desiring a safe investment at a high rate of interest, a new Bond issue, paying 6 per cent interest.
- These are ten-year Gold Bonds dated May 1st, 1920, and maturing May 1st, 1930, with interest coupons payable May 1st and November 1st.
- Bonds are in denominations of \$100, \$500 and \$1,000.
- The General Revenue and all the assets of the Province are behind this investment.

- Investors may purchase these Bonds direct from the Department of the Provincial Treasurer, without commission of any kind or unnecessary delay in delivery.
- This offering is intended chiefly for the benefit of the small investor, so that the industrious and thrifty, be he laborer, artisan, farmer, or professional man, may invest his savings by mail.
- Romances should be made by marked cheque, money order, or postal note.

These Bonds may also be obtained from any recognized Bond House in the Province of Alberta

House and Home

A house is built of bricks and stones, of sills and posts and piers:
But a house is built of loving deeds that stand a thousand years.
A house, though but a humble cot, with its walls may hold
A home of priceless beauty, rich in love's eternal gold.

A Nautical Superstition

A curious exemplification of an old nautical superstition occurred recently in the Calcutta river, when the Port Commissioners' tug Retriever was sunk by colliding with a vessel she was towing to sea. Sailors affect to believe that it is particularly unlucky to name any vessel after one which has been sunk. In 1887 another Retriever, after which the present one had been named, was sunk in the same river, and curiously enough, under very similar circumstances. The first Retriever was also towing a sailing ship to sea, and in her case, tip, collided with it and went down, while the ship as in the present instance escaped.

Consoloed

She lay in his arms and snuggled her head against his neck,
A rush of emotion surged through her tenderly; he caressed her and she closed her eyes in delight.
"Poor kitty. Did I step on your tail?"

The Conundrum of the Ages

My mind confronts a riddle,
Whenever I take note,
Of the fish tales of fellows—
When hard luck got their coat.
My sleep's upset by anxious doubt,
Since I have heard the tales,
About the fish that slipped away,
"The fellows big as whales."
I'm in a fearful quandary,
What can a fellow do,
When every friend will swear on oath,
"A monstrous fish slipped through."
Now who can solve my problem,
And grant my lifelong wish,
"Are fishermen all big liars?"
"Or do only liars fish?"
—Theodore Sharp

The Canmore mine case, in which the power of the operators to deduct the check-off for the U. M. W. of A. has been called to question, will be carried to the appellate court, the supreme court en banc having decided against the preliminary objections, raised by counsel for the Department of Justice and counsel for the coal company.

Comfort WITH Economy
The New Canadian Car

THIS Overland is built from the ground up to secure riding comfort, light weight and economy.
Triplex Springs combine, in a remarkable way, the economies of light weight with the luxury of riding, formerly possible only in a heavy car of long wheelbase.
In every detail of its equipment from Electric Starting and Lighting to Speedometer, Overland is high-grade and complete.
The large Canadian factory and service organization behind the Overland are big factors in the success of this new car for a new Canada.

That Precious Child

Precocity in children takes the form of a surprising diplomacy in some cases.
A little girl, on entering a crowded bus, had to sit beside a man who had been in close contact with a quantity of pre-war whisky.
After looking round uninquiringly for a few seconds, light broke on her. She turned to her mother and remarked:
"What a lovely smell of trifle!"

Women Can Fortify Their Health

With constantly aching backs, weary, dragging-down pains, dizzy and nervous headaches, women have a hard burden to carry. It is with every woman to fortify herself against these derangements which are present when extra demands are made upon the system by Nature's laws. No better remedy exists for woman's peculiar ailments than DR. HAMILTON'S PILLS, which possess tonic properties that act upon the proper organs at the proper time. To prevent headache, to overcome dragging weariness, backache, nervousness and pallor — to look well, sleep well, eat well and enjoy the manifold blessings of sound, regular health, every girl and woman should regulate her system by Dr. Hamilton's Pills, 25c per box.

Love of The Wild

— BY —
ARCHIE P. McKISHNIE

Printed by Special Arrangement with The Alliance, Toronto, Ont.

(Continued.)

"Watson?" questioned Paisley. "Watson's likely comin' over today. Dad's got a letter from him."

Paisley crammed his hands in his pockets and shrugged his shoulders. "I scented trouble when the Colonel built that mill over on Totherside," he declared, "but there was no way of stoppin' him. It was his own land he built on; it's his own timber he's been sawin'." I understand he's layin' plans to get our timberland, and there ain't no tellin' just what a man like him will do to gain his ends. But, Boy, we're here first — don't you forget that."

"I'm not forgetting it," returned Boy grimly.

"Say," said Bill, abruptly changing the conversation, "when is Gloss's birthday?"

The shadow left Boy's face and he looked up with a smile.

"Why, it'll soon be now," he answered; "she's nineteen next month."

"I didn't figure on lettin' you in on this, grinned Paisley. But I reckon you need cheerin' up. You know them silver-fox furs that Smythe offered me my own price for? Well, I'm not goin' to sell 'em to Smythe nor anybody else. They're for Gloss."

"For Gloss?" repeated the Boy, "for Gloss?" Say, Bill, you can't afford to give them furs away—not even to Gloss."

"Me and Injun Noah are makin' her coat," chuckled the man. "Such a coat, Boy! No lady in this land has ever had such a coat before! Silver-fox pelts at three hundred dollars apiece. Think of it, Boy! And there's six of 'em—four grays and two blacks. And the coat's to be lined with minkskin, too—think of that!"

He took his friend by the arm and took him into the house. Boy liked Paisley's home; it was always so bright, so tidy, and so cheerful. The wide table of heavy oak with solid legs artistically carved, standing in the center of the main room, the carved high-backed chairs fashioned by a master hand, the crude charcoal sketch of marsh and wood and water scenes on the whitewashed walls, gave him a sense of restfulness.

A great iron tea-kettle suspended over the fire of hickory logs was discharging a cloud of steam that drifted into the rafters. Paisley came forth from an inner room carrying a huge platter piled high with food. "Never seen the partridge in better condition," he avowed. "I shot six last night and I've been feasting ever since. Just pull up and devour, Boy, while I give old Joe some of his choice bones. I've been savin' 'em up for him. I'll get you some of my special brew of tea soon's I wipe the reproach out of that setter's brown eyes."

Boy drew up to the table and fell to with an appetite such as only men of the woods possess. Having attended to Joe's wants, Paisley placed a pot of fragrant tea at his guest's elbow, and leaning back in his chair with a smile of content, lit his well-seasoned clay pipe and smoked.

His eyes followed those of Boy, who was gazing on the smaller of two rifles hanging above the fireplace.

"You've often wondered why I never use the little gun," he remarked, leaving his chair forward and leaning upon the table. "And I've never told you. I'm goin' to tell you now. I won the rifle from a man down near Sandwich. He was a bad man all

round, and up until I met him just about made the laws of his community. I happened along there one night, and bein' in no hurry, made up my mind to stay around for a time. The feller I speak of owned that rifle. He was a big chap, about five years older than me, and was supposed to be a fisherman. In reality he was a smuggler, and he was a slick one, and no mistake. When he wasn't smuggling he was gambled with the sailors and passengers of the lake boats. A poor little hunchbacked slater kept house for him, and he used to ill-treat her. Once I happened along, and stopped him from strikin' her with a whip. Of course, he always hated me after that. One afternoon there was a shootin'-match in the neighborhood, and he beat me shootin'."

Paisley sat back and smiled. "Yes, he beat me shootin', Boy. Then he got boastin', but I didn't say a word. He finally offered to let his rifle against mine that he could beat me again. I didn't want more hard feelin', but I simply had to take a game. A man couldn't just take a dare in that wild country, so we had the match right there, and I won his rifle. He didn't say anything but he looked murder. I left the place soon after that, and about a year later I came along that way again. I heard then that the fisherman chap had cleared out to no one knew where, and left his sister sick and in want. I went over for their charity and found the little woman dyin'." She knew me and she seemed to want to let me somethin'. But the end came there she could say it."

Paisley nodded toward the rifle. "I've never shot that gun since, and I won't. I'd be ashamed to shoot a gun that belonged to a man who'd leave his crippled sister to starve."

"Did the sister know where her brother had gone?" asked Boy.

"No, or if she did she couldn't tell me."

"I'll see him—leave that to me," Boy pushed back his chair and rose from the table.

"I don't want to understand how any man could do such a thing, Bill. What was the feller's name?"

"His name was Watts, Jim Watts," answered Paisley, swinging the kettle off the fire. "I ain't thinkin' as I would know him, but now, even if I happened to run across him, this rifle happened sixteen years ago."

He followed Boy outside and the two walked over to an out-house standing in a grove of beeches.

"I haven't had much time for this folk since the wolves got poor-old Mooley last winter," said Paisley. "Guess I'll be gettin' another milk-cow soon 'cause it's quite a bother havin' to go to Peeler's for my butter."

"I was goin' to ask you about Peeler," said Boy. "I wish, Bill, you'd see him and persuade him not to sell one stick of his timber to Halliburton or his agents. Jim's an easy-going sort, who might be led off quite easy, and it's up to us to see that he isn't."

Paisley replied. "And I'll see the rest of the Bushwhackers, even old man Broadbrook and his sons, who haven't any particular use for me, somehow." "I guess what the Broadbrooks do won't matter much," laughed Boy. "They hate everybody and everything it seems. I don't know why."

He picked up the fork and turned toward the path. A west wind had piled up bank of long grey clouds above the woods. The wind came and from the distance came the dull boom of the waters beating upon the mucky shore of the bay.

A few yards down the path Boy halted. "Was that tellin' me 'bout the talk you had with the teacher. I wish you'd get better acquainted with him and make him see that his place isn't here."

"If he was half as smart as he thinks he is, see that it isn't," replied Paisley.

"And Bill," called Boy from the edge of the wood, "I guess Mary Ann knows a real man when she sees one. Keep askin' her till she says 'yes,' Bill."

As Boy found the creek path a gust of wind, mad with the spray of Rond Eau, smote against his face with biting force.

From across the creek came the jarring notes of the school bell. Then the wind fell, and the clouds parted to let a misty web of warm sunlight through to the world.

(To be continued.)

To Entertain V.C.'s at Exhibition. A movement is on foot to have the 30 or 40 men in Canada who have won the Victoria Cross, meet at the Canadian National Exhibition, Toronto, and invitations will be sent out with this in view. It is proposed to specially honor the V.C.'s at the exhibition.

In Peru pineapples grow to the weight of 20 pounds.

The egg of the ostrich equals 22 hen eggs.

'Mounties' Active In Eastern Canada

Helping to Enforce Immigration Rules and Prevent Any Smuggling

Equipped with unromantic motorcycles, members of the Royal Canadian Mounted Police, recently posted to their new stations in Eastern Canada, are gradually increasing their activities along the St. Clair border. Stringent enforcement of the immigration rules is being insisted upon, and all persons suspected of being guilty of breaches of the immigration or customs laws are brought before the authorities and asked to explain. Reports of extensive smuggling of Chinese into the United States has resulted in the appointment of a force of special officers on the American side. The matter has become somewhat serious since his rifle against mine that he could beat me again. I didn't want more hard feelin', but I simply had to take a game. A man couldn't just take a dare in that wild country, so we had the match right there, and I won his rifle. He didn't say anything but he looked murder. I left the place soon after that, and about a year later I came along that way again. I heard then that the fisherman chap had cleared out to no one knew where, and left his sister sick and in want. I went over for their charity and found the little woman dyin'." She knew me and she seemed to want to let me somethin'. But the end came there she could say it."

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, and lower bowels. Children love this fruit taste. Full directions on each bottle. You must say "California."

German Warships To Be Broken Up

Other German Battleships Have Been Set Apart for Use as Breakwaters

Edinburgh, Scotland.—The recent arrivals of various German battleships and other craft which are being handed over to the British authorities under the peace treaty conditions have created considerable interest in this district. One of the most interesting of these has been the former well-known commerce raider, the Mowee, which earned a great amount of notoriety during the war. This vessel recently arrived in Leith Roads, and is now to be handed over to a London firm in order to be specially fitted out for the fruit trade.

It will be recalled that the Mowee, which was only built during the war, performed some daring exploits during the early part of 1916. This famous raider captured the Appam, and on the succeeding day sank the Clan McTavish. In a two months' raiding cruise, and by adopting various disguises, the Mowee managed to have captured or sunk no less than 15 vessels.

It has been announced that two of the German battleships which had recently been surrendered, namely the Baden and Heligoland, are to be sent to Portsmouth where they will be used as target ships. The Baden is a new super-dreadnought, plated with massive armor and embodies all the latest German ideas of gunfire protection. Used in the manner indicated, much valuable information will no doubt be obtained by our naval constructors as to the efficacy or otherwise of that type of armor.

It is also stated that other German battleships which have been allocated to Great Britain have been set apart for use, when filled with concrete, as breakwaters in the vicinity of Freshwater, Isle of Wight. In this region coast erosion has been very serious, and it is felt that these German vessels packed with concrete should make a very formidable barrier to the encroachment of the sea.

The former German destroyers V 80 and V 127, which were allocated to Japan, have, it is learnt, been handed over to the Granton Ship-breaking Company to be broken up; these vessels are at present moored in the West Harbor at Granton. The former German battleship Nassau, which has been moored for some considerable time near Burntisland, has left the Firth of Forth to be broken up elsewhere.

Two Good Reasons

Why the People of Canada Should Eat More Fish

Two good economic reasons why you should eat more fish: It is cheap and nutritious, and provides a thrifty meal.

One of Canada's greatest sources of wealth is her fisheries, and you help develop the industry by eating fish, and also help to put Canada in a better financial position.

Probably you are not aware how little fish Canadian people use.

Great Britain is one of the greatest fish-consuming countries in the world. During 1918 she had a per capita consumption of 58 pounds, and in 1919, it is believed, this was increased to 60 pounds. This means that each individual consumed at the rate of more than one pound per week.

In the United States last year it is estimated by officials at Washington the per capita consumption was 19 pounds. Although little reliance can be placed in this estimate, there is no doubt but that the local consumption in the United States has increased greatly in recent years.

A few years ago the per capita consumption in Canada per annum was a matter of ounces. Through the combined efforts of the Canada Food Board and the Fisheries branch it is estimated that the local consumption at one time reached a point equal to 45 pounds per capita. During 1919 it is estimated that the per capita consumption was somewhere between 23 and 25 pounds per annum. Canada is one of the greatest, if not the greatest fish producing countries of the world. Why have our people so little faith in fish?

A Prize for Britain

The Largest and the Most Wonderful Airship in the World

Some time this week there will arrive in England from Germany Zeppelin L-71, the largest and most wonderful airship in the world. Surrendered to Britain as part of the penalty of defeat, it has been reported on several occasions that this airship has been so effectually crippled by the Germans that it would be impossible to navigate it. That would be quite in keeping with the long list of attempted exactions of peace terms of which the "Big Bear" is a prominent one. Whatever the truth of that story, the fact now is that the vessel is ready to fly to England, and will become a part of the British aerial fleet, the most modern in existence.

It is not improbable that the L-71 may be used in some of the contemplated flights to the more distant overseas Dominions. In navigable weather conditions this would be an easy feat for the craft, which has a

The Joy Of A Perfect Skin

flying radius of 12,000 miles. The provision of proper landing stations might be the chief obstacle to a tour to Australasia via Canada, or a journey to India by way of Egypt. Plans like these are talked of in Britain, which is quite used to airships of the latest kind, though the L-71 will be a new wonder there, as it is twice the size of the famous R-34 that flew to the United States and back with ease last year. As an object lesson for the Dominions in the possibilities of aerial communication it would be worth while to spend some money in visits of the Great Zeppelin to Empire countries.

Such a tour would also include a flight over the city of New York, for the bombing of which the monster airship and other English cities know what death and destruction the smaller Zeppelins can inflict. New Yorkers might at least guess what would have happened to their city had the L-71 been ready for action before the war ended. Whether she comes to this side of the ocean or not it may be taken for granted that Britain will put the surrendered aerial masterpiece to good use of itself and as an instrument of instruction for its own aircraft designers and builders.

Toronto Globe.

Authors of National Anthems

Sir Adolphe Routhier, who died on Sunday night, won his place in the Hall of Fame as the author of "O Canada." Alexander Muir, the venerable author of "The Maple Leaf Forever," died in Toronto about a dozen school teacher. Routhier was a Catholic jurist; Muir a much-loved school teacher. Routhier was a Catholic; Muir an Orangeman. Musically "O Canada" is conceded to be the finest song of the two and its acceptance in Quebec is general. "The Maple Leaf Forever" will doubtless continue to be played and sung for many years to come.—Ottawa Journal.

Clean Dinner—Is there an yzoup on the bill-of-fare? Waiter.—There was, sir, but I wiped it off.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Headache, Neuralgia, Toothache, Rheumatism, and all the ailments which the genuine Aspirin, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer" Tablets of Aspirin in an unbroken "Bayer" package. There is only one Aspirin—Bayer. You must say "Bayer." Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monacopolitana of Silesia. While it is well known that Aspirin means Bayer, the public is advised to look for the Bayer cross on the wrapper of Bayer Aspirin, which is stamped with their general trade mark, the "Bayer Cross."

CUTICURA HEALS BABY'S RINGWORM

On Head, Cross and Fretful Hair Fall Out

"When my baby was three months old her head broke out in little red pimples and then in a week it broke out in ringworms. The ringworms were very large and there were several on her head, and her scalp would bleed. She was very cross and fretful at times, and her hair was falling out."

"I used Cuticura Soap and Ointment, and after I had used one cake of Cuticura Soap and two boxes of Cuticura Ointment she was healed." (Signed) Mrs. Leah Sargent, Nampa, Idaho, Feb. 24, 1919.

Use Cuticura Soap, Ointment and Cream for all toilet purposes. Cuticura Soap, Ointment and Cream are sold everywhere. Get the real Cuticura through the trademark on each box. Cuticura Soap Manufactured by Cuticura Soap Manufacturing Co., New York, N.Y.

Strangling the League

United States is Largely Responsible For Existing Difficulties

Had the United States followed the European Allies in Ratifying the Treaty of Versailles it is reasonable to suppose that by this time the league of nations would have been on its feet, and that much of the existing confusion would have been prevented. At present a rather common American pose is one of indifference to European affairs. Neither this attitude nor any other assumption of blamelessness can alter the fact that the United States is largely responsible for the existing difficulties and for the loss of much which was thought to have been gained by the victory of justice and democracy.—Cleveland Plain Dealer.

Your Eyes

Brannan's Eye Lotion

Is the best eye medicine ever known. It is quickly relieved by Brannan's Eye Lotion. No Stinging. Just Eye Comfort. At Your Druggists or by mail 60c per Bottle. For Book of the Eye free write to Brannan's Eye Remedy Co., Chicago.

COUNTER CHECK BOOKS

Provide the only means by which you can keep an absolute accurate check on your sales. The new luxury tax and sales tax makes it necessary to keep such a record. We make sales books suitable for any line of business, with either duplicate or triplicate copies.

TRIPLICATE BOOKS

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style.

Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this brand of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

APPLEFORD COUNTER CHECK BOOK CO., LTD.

HAMILTON, ONT.—BRANCH OFFICES AT TORONTO, MONTREAL, WINNIPEG AND VANCOUVER.

Encourage Dairy Industry

Will Sell Pure Bred Stock on Easy Payments

To encourage the development of the dairy industry the Saskatchewan Government has sent A. J. Clark, of the live stock branch, to the east to purchase one hundred head of young grade dairy cows and heifers.

An effort will be made to secure as many Shorthorns of a good milking strain as possible and the rest will be grade Holsteins and Ayrshires.

These cows will be sold on easy terms to farmers already engaged in the dairy business or who are entering it, who will agree to have all cows purchased from the department bred to pure bred sires of the same standard strain.

Nine men constitute a jury in Mexico, and a majority gives the verdict. If the jury is unanimous there is no appeal.

Faint and Dizzy Spells.
Weakness and Shortness of Breath.

You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, smothering sensations, weak, sinking, all-seeing feeling, choking sensation, etc.

Many men and women become rundown and worn out when other wise they could be strong and healthy. If they would only pay some attention to the first sign of heart weakness.

No remedy will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy and normal condition as Milburn's Heart and Nerve Pills. Mrs. C. A. S. Drake, Paris, Ont. writes:—"I have used on towards the second box of Milburn's Heart and Nerve Pills and find they have done me good. I had those fainting, dizzy spells, once in a while, and also weakness and shortness of breath, and would become so choked up at times I could hardly sleep without sitting up in bed. When walking too fast I would have to stop and try to catch my breath. I feel a lot better since I have used your pills and know that they have helped me wonderfully as I have improved very much."

Price 50c a box at all druggists or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

In Burma people of superior rank must not dishonor themselves by passing rudeness to persons of inferior rank. Thus a nobleman must not pass through a hall when a servant is occupied in a chamber above. This is one of the chief reasons why most of the houses in Burma are but one story.

The barn owl, when she has young, brings a mouse to her nest about every 12 minutes. As she is actively employed at both evening and dawn and as both male and female hunt, 40 mice a day is a low computation for the total capture.

In Japanese cities many of the streets are devoted exclusively to the sale of particular articles.

Keeps Baby's Skin Healthy

If every mother could only realize the danger which lurks in the neglect of chafing and skin irritations she would not take chances on being without Dr. Chase's Ointment to apply after baby's bath.

It arrests the development of eczema and makes the skin soft, smooth and velvety.

50 cents a box, all druggists, or \$1.00 direct, The T. Milburn Co., Ltd., Toronto.

Dr. Chase's Ointment

Alien Immigration
On the Increase

No Shortage of Foreign Labor in U. S. Anticipated.

The present immigration situation portends no curtailment of the supply of foreign labor in the United States, Frederick A. Wallis, commissioner of immigration at Ellis Island, commented in making public statistics for the fiscal year just ended.

Though total departures were 334,254, or 19,736 in excess of arrivals, he declared that the incoming tide of aliens steadily is increasing. He pointed out that the immigration station was not re-opened on a pre-war basis until last March, and that most of the outgoing aliens are bringing their families back when they return.

Immigrants are arriving as fast as they can obtain transportation, Mr. Wallis said.

At Yoho Camp

Beautiful Report in the Yoho Valley

Opened to the Public

On July 1st Yoho Camp was opened to the public. This camp will have accommodation for at least 25 people and will be located on the same site as in the past, in the Yoho Valley, about a mile and a half from the foot of the Takakkaw Falls. It consists of about ten well tents (for sleeping purposes) and each tent will accommodate from three to four persons comfortably.

The rates will be on a basis of five dollars per day; two dollars per bed and one dollar for each meal.

The camp will be situated about 11 miles from Field Station and affords one of the finest long drives in the Rockies. The road crossing the Kicking Horse river follows the milky glacier bed streams to where it joins the Yoho River, near the entrance of the valley at Mount Field, round which it swings and up the valley until some precipitous cliffs are reached. Up this it zigzags to a higher level until the camp is reached a short distance from the beautiful Takakkaw Falls.

As an alternative this trip can be made by carriage to Emerald Lake, thence Pony Trail, which leads up through forests to the Yoho Pass an altitude of 6,000 feet, where it is joined by the trail from Field over Mt. Burgess. Reaching the summit a wonderful scene is revealed.

At the summit a small beautiful colored lake, the descent is made into the Yoho Valley and to the Camp. This distance from Emerald Lake is about six miles and the trip can be made in many interesting and charming trips can easily be made from Yoho Camp to Emerald Lake, Yoho Falls, Takakkaw Falls and Burgess Pass.

The trip to the coast is not complete unless a trip is made to some of the beautiful resorts and view the interior scenery at leisure. Canadian Pacific agents will give full information and descriptive booklets on the various resorts.

National Industrial Meet

Will Follow Up On the Conference Held Last Year

Many are under way for the calling of another national industrial conference, at which both capital and labor will be in attendance. The appropriation for this purpose was provided by parliament in the Department of Labor estimates which passed during the last week of the recent session.

The conference held last year, it is felt, was productive of good results in bringing capital and labor together and ironing out many incipient differences. This year it is hoped to continue the good influence started last September.

It is not likely that the conference this year will take place before September or October, but the probable dates are expected to be announced in the near future.

Sardine Fishing

Along the Pacific coast sardines are used in hunting sardines by sh-canning factories. Since the first of the year naval sealines have been flying out from the sea coast, sighting schools of fish and sending a wireless message to the naval station giving the direct location. The naval station then telephones the information to the office of the fish and game commission. Fishing fleets are immediately directed exactly where to seek their game and are consequently assured of a big catch.

At Lima, Peru, the sun is scarcely ever hidden by clouds for a day throughout the whole year.

In Java it is supposed that if a live sheep is thrown into the water it will indicate the position of a drowned person by sinking near it.

"Corner" in Storms

The island of Java owns up to an average of 97 storms a year and is, proportionately two a week, the world's record. Sumatra stands beside Java, with 86 per cent. Borneo and the Gold coast, have 50 each, Rio de Janeiro, 51; Italy, 38; Buenos Ayres, Caracas and Mexico, 25. France and South Russia, the cold regions, have 16 apiece, Spain and Portugal 13, Sweden and Finland eight. East Turkestan gets off very lightly with a total of none.

Apart from the human species, no land animals can sing.

Another Case of Blood Poisoning

Persisted in paring his corns with a razor. Foolishness when cure is so painless and sure with Putnam's Corn Extractor. Use Putnam's only—it's the best—guaranteed and painless, price 25c, at all druggists.

Ice Mines

Walls Are Incrusted in the Hottest Months of Summer

A miner, prospecting for lead, many years ago, blew a shaft into a rocky hillside at Bibby's Park, near Edge-water. The mine was abandoned, but the following year its walls, and the cavern leading from it, were discovered incrustated with ice; and this has been reappearing annually, and strangely enough, in the hottest part of summer.

Natural scientists, to explain this phenomenon, claim that owing to the peculiar formation of the caverns the cold air of winter does not permeate and settle in them until late in the spring. At that time the water from the spring thaws is seeping its way through, and, meeting this cold air, freezes. It remains there frozen all summer. In July and August picnic parties may be seen freezing ice cream at the mouth of the ice mine with ice they have chopped from the walls. There is said to be a larger ice cave in the cliffs at Deborah, where winding passages extend back for miles into the hills, and that there is evidence that the Indians had discovered this at the old days and used them as storage places for their food in summer.

Cataract is a local disease greatly influenced by constitutional conditions. It is caused by the action of the HALL'S CATARACT MEDICINE. It is taken in the form of a pill, and is the most powerful of the system. HALL'S CATARACT MEDICINE. It is taken in the form of a pill, and is the most powerful of the system. HALL'S CATARACT MEDICINE. It is taken in the form of a pill, and is the most powerful of the system.

Vancouver Produces

Tons of Strawberries

Holds Highest Record for Production Per Acre in Canada

More than 600 tons of strawberries were harvested in the districts of Gordon Head and Keating, on Vancouver Island, during the season 1919, and they yield for about \$212,750, at an average price of \$35 per ton.

Under careful cultivation strawberries are producing from \$500 to \$700 gross per acre, and the total space devoted to last season's crop was about 400 acres. This district holds the highest record for production per acre in Canada.

Last year's production represents a mere trifle of what the island is expected to produce this season, for this luscious fruit thrives in many parts of the island and the market for strawberries is larger than for any other fruit.

Canners from Western Canada contract for strawberry pulp. Jam factories take fresh strawberries for use in their products and for the fresh fruit for table use there is always a demand greater than the supply.

With a climate softened to a degree that at times approximates the semi-tropic by the Japanese current, this region seems destined to become one of the greatest producers on the continent.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms are literally ground up and pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach, and maintaining it in vigorous operation so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

When a humming bird is stripped of its feathers it is no larger than a bumble-bee.

W. N. U. 1324

Should Eliminate Non-Laying Hens

Makes More Room and Keeps Feed Bills Down

The season of the year is at hand when poultrymen should be considering the advisability of eliminating non-laying hens from the flock. It is insinuating the non-laying hen has a tendency to keep the egg production at a high level, makes more room for those that are laying during the hot weather and besides this it helps to keep the feed bills down. Early cullers are poor breeders. Probably from five to ten percent of the birds in the flock are not laying at this season of the year and could advantageously be eliminated. It does not follow that all broody hens should be taken out for many of them will start laying again as soon as the broody period is broken up. On the other hand, birds that are moulting at this season will, as a rule, be found non-productive. It is best to give the hens the benefit of the doubt and to remove them only if continued until all the evidence has been examined. It is perhaps best to examine the shanks, beak, carotids (in the light breeds), and the vent to determine whether they are pale or yellow in color. Yellow in color points denotes hens that are moulting and will help when used properly to eliminate the non-laying hens.

Minard's Liniment Relieves Diphtheria. Although sometimes seen 400 leagues from land, the frigate-bird is said to return every night to its solitary roost.

HOW TO OVERCOME NERVOUS TROUBLES

A Returned Soldier Tells How He Regained Health and Strength

Nervous troubles of all kinds, particularly nervous debility, work remarkable transformations in the patient. The change is both physical and mental. The sufferer loses weight and strength, and frequently becomes irritable and fault-finding. Troubles that were once thrown off without any difficulty assume exaggerated proportions. Other symptoms of this nervous condition are poor appetite, headache, exhaustion after little effort, and frequently distressing attacks of nervousness.

The cause of this debility is generally starved nerves. The blood, which gives the nervous system its strength, has become thin and weak, and until the blood regains its tone and strength, the nervous system will remain in the condition of the nerves. In cases of this kind Dr. Williams' Pink Pills will be the very best medicine. They make rich, red blood which feeds and strengthens the nerves, and in this way restores the sufferer to full health and strength. Proof of this is found in the case of Mr. Fred. S. Sauer, London, Ont., who says: "While on service with the Imperial forces in France I was severely wounded through continual hardship and shock. I was sent back to the base hospital suffering so that I could not do any work. After spending some time in the hospital I was sent back to England as a unit for further service. After spending a long time in Netley hospital, I was given my discharge, but was still a nervous wreck. I had lost all the strength nor ambition to do anything. In London I doctor for three or four months with a civilian doctor, who finally advised a change of climate. I was terribly nervous, suffered from sleeplessness, smothering and sinking spells, and pains in the heart; my hands and feet were numb and cold. I was in this condition for some time, and at last I decided to come to Canada, and shortly after reaching this country was advised to try Dr. Williams' Pink Pills. After I had taken the pills for some weeks I found myself improving, continued taking the pills for several months with the result that they fully restored my health. My nerves are now as steady as a rock; my appetite the best, and my eyes and skin, which had turned yellowish, are clear and healthy looking. I feel like a new man in every way and fit for anything. I have since recommended the pills to several friends, and know of several cases where they were beneficial in the influenza epidemic. I am of the opinion that should any of my returned soldier comrades use Dr. Williams' Pink Pills they would be a great help to them."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Given Supreme Power

Supreme power in the government of Poland and full military authority has been vested in a national council of defence which was created by the Polish diet.

Kept Kipling's Checks

Author's Balance in Bank Did Not Decrease

At one time Rudyard Kipling paid his bills, no matter how small they happened to be, with checks. After awhile he discovered, to his amazement, that his bank account showed a much larger balance than the stubs of his checks book warranted. In fact, while he was drawing checks for small amounts almost daily, his money in the bank did not seem to dwindle in the least. For a long time he was at a loss to account for this astonishing result until he happened one day to visit an office, the occupant of which was an enthusiastic autograph collector. There the author saw one of his own checks, framed and hanging on the wall. The mystery was solved. It appeared that the local shopkeepers found that they often got more for Kipling's checks by selling them to autograph hunters than they could by cashing them at the bank, and so, although the author kept drawing checks, his balance remained almost intact.

Minard's Liniment Relieves Colds, etc.

Produced Minerals at \$254,001.586

Minerals to the value of \$254,001.586 have been produced since the discovery of silver at Cobalt in 1903, and the finding of gold in the Porcupine and Kirkland Lake districts about six years later, according to returns based on official figures. Dividends paid by the mining companies have aggregated \$99,437,321.

These Pills Cure Rheumatism.—To the many who suffer from rheumatism a trial of Parmentier's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and patiently, and they give evidence of their beneficial effects.

THIS WOMAN'S RECOVERY

Shows Remarkable Curative Power of Lydia E. Pinkham's Vegetable Compound.

Chester, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pain in my sides and was not regular. Finally I got so weak I could not get up stairs without stopping. I tried two doctors but they did me no good. I saw your medicine advertised in the newspaper and thought I would give it a trial. I took four bottles of the Vegetable Compound and do all my housework, milk eight cows, and do a hired man's work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish." Mrs. HENRY JAMES, R. R. No. 4, Chester, Ontario.

It hardly seems possible that there is a woman in this country who will continue to suffer from the pains of a trial of Parmentier's Vegetable Pills.

They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and patiently, and they give evidence of their beneficial effects.

Do not suffer another day

Do not suffer another day with rheumatism, neuralgia, or any other painful disorder. Parmentier's Vegetable Pills are recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and patiently, and they give evidence of their beneficial effects.

Dividends paid by the mining companies have aggregated \$99,437,321.

These Pills Cure Rheumatism.—To the many who suffer from rheumatism a trial of Parmentier's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and patiently, and they give evidence of their beneficial effects.

Do not suffer another day with rheumatism, neuralgia, or any other painful disorder. Parmentier's Vegetable Pills are recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and patiently, and they give evidence of their beneficial effects.

What For?

Just why America should be feverishly building huge battleships and battle cruisers at a rate that will soon make us the strongest naval power on earth is a question that is interesting Great Britain, Japan, and some people in our own land. The launching of the "Tennessee," the world's largest battleship, has renewed talk about this matter.—Literary Digest.

The history of horse-racing dates back more than 600 years, and racing in England was known to exist as early as the tenth century.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Syrup. Worm Exterminator to drive out the parasites.

The largest mass of pure salt in the world lies under a section of Galicia. It is known to be more than 500 miles long.

THIS WOMAN'S RECOVERY

Shows Remarkable Curative Power of Lydia E. Pinkham's Vegetable Compound.

Chester, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pain in my sides and was not regular. Finally I got so weak I could not get up stairs without stopping. I tried two doctors but they did me no good. I saw your medicine advertised in the newspaper and thought I would give it a trial. I took four bottles of the Vegetable Compound and do all my housework, milk eight cows, and do a hired man's work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish." Mrs. HENRY JAMES, R. R. No. 4, Chester, Ontario.

Do not suffer another day

Do not suffer another day with rheumatism, neuralgia, or any other painful disorder. Parmentier's Vegetable Pills are recommended. Of Local and General Interest

J. Grafton and family are spending a few days in camp at Crow's Nest Lake.

Murray Saunders, of Calgary, was renewing old acquaintances around The Pass this week.

Admiral Fisher, first lord of the British admiralty, died in England on Saturday morning.

James Howard, of Toronto, was a visitor with his sister, Mrs. Henderson, the early part of the week.

J. M. Coutts arrived from Cranbrook on Sunday night to take a position with the Blairmore Hardware Co.

W. H. Chappell and family left here last week on an extended holiday trip to eastern Canada points.

Joe Grafton has with him this trip a local overseas trench perspective, which is quite a souvenir of the war.

The officers of the local Rebekah Encampment and subordinate lodges will be installed at a special meeting tonight.

Oddfellows and Rebekahs of The Pass are contemplating holding their annual picnic at Crow's Nest lake in the very near future.

Labor Day will be celebrated at Coleman by a big sports programme to be staged under the auspices of the Coleman Curling Club. Watch for bills.

Charles Stevens, the latest daredevil to undertake to ride Niagara Falls, went over the brink in a barrel on Sunday and was dashed to pieces on the rocks below.

Rev. Wm. Ivens, Messrs Dixon and Johnson, convicted strike leaders in the Winnipeg strike, were elected by large majorities in Winnipeg in the recent elections.

FOR SALE—Lot on corner of Dearborn Street and Fifth Avenue, just south of the Blairmore depot. Most desirable site for residence or business block. For a snap, apply to Fred Grenier, Cosmopolitan hotel.

Local Orangemen celebrated the glorious twelfth in a fitting manner. Most of them slept in from Sunday until Tuesday morning, when Charlie woke and asked his compatriots if Ireland was still on the map.

Miss Bertha Roy, of Maitland, Nova Scotia, and Miss Margaret Bouthiller, of Calgary, were the guests of Mrs. L. H. Putnam this week while visiting the latter's brother, who is a patient at the Frank Sanatorium.

The raid on the blind pigs of the Pass seriously handicapped the promoters of the glass factory in selling stock. It is thought probable that the proposition will be dropped for the time being until there is a greater demand for glass eyes.

Fred Roo, probably the best known and most popular Pass old timer, died suddenly at Elko on Monday afternoon. He was best known for his witty correspondence dealing with Elko news to British Columbia and Alberta papers. He leaves a wife and several grown-up children to mourn his departure.

All the tin cans and beer bottles in the Pass should be assembled in Blairmore on Wednesday next to celebrate the marriage of a local youth to a Mrs. Somebody, of Michel. Boys are asked to see that all bottles and cans are empty before they start to rough-handle them.

The ball game between Michel and Blairmore, on the local grounds yesterday resulted in a victory for the locals to the air of 11 to 1. Michel's catcher had the misfortune to sustain a broken finger in the second last inning. In the absence of the team's pitcher Doc Weldou did the trick.

Mrs. T. Murphy is up from Lethbridge on a brief visit to her parents.

Miss A. Picard has accepted a position in the local branch of the Union bank of Canada.

Several days' rain during the past week are estimated to be worth twenty million dollars to Southern Alberta.

A Peace Day dance will be given by local veterans at the opera house on Monday night next, which promises to be a big affair.

The interior decoration of the Cosmopolitan hotel is nearing completion under the direction of Messrs. Goyette and Blais, of Frank.

Thomas Finnegan, formerly civil service instructor at the Frank military hospital, who now resides in Edmonton, spent the week in this southern city.

Pete is now perhaps registered among the criminals of Alberta, having paid a fine for selling liquor stronger than water. He says: "No more for me, mista!"

Miss B. Baird has resigned her position with the Union Bank, and Miss M. Kemp from the postoffice, to take positions in the office of the West Canadian Collieries.

Robert Haysey, business agent and organizer for the Canadian Brotherhood of Stationary Engineers, Firemen and Helpers, was in town from Calgary on Wednesday.

Misses McCollum and Worth left here last week and on an extended holiday trip. After visiting several western States cities they propose going north towards Dawson City.

People in the Crow's Nest Pass, who haven't had a real bath since leaving their parents thirty years ago, are reminded that cattle dipping is in full swing on the prairie just now.

The question is asked by many: If the police from Lethbridge were armed with warrants to search Pass blind-pig joints, why were there so many exemptions?

Yesterday was observed as a civic holiday at Pincher Creek, and the bulk of the citizens, accompanied by the I. O. O. F. band, spent the day picnicking at Waterloo Lakes.

Blairmore played football at Bellevue with Bellevue on Tuesday evening. The game was the fastest of the season and resulted in a draw 1-1. Up to near closing time Blairmore led with one—all.

Yes, dear friend, the Lord's Day Act is being observed and enforced in Blairmore to the letter. A restaurateur is not permitted to allow a box of decaying fruit to be taken from his premises, while beer was being unloaded from a car near the depot for day's sale and consumption in a wide-open bar.

Canada's coal bill with the United States last year reached the tidy sum of \$70,603,005. For a total tonnage of 10,411,813 tons. While only 300 tons more than were exported in the previous year, the total value was more than doubled. Alberta exported nearly double the amount exported by New Brunswick, Saskatchewan, the Yukon and British Columbia combined.

The Chinook correspondent to the Granville Advertiser writes: "How times do change. Three years ago the principal street topic was automobiles and which could climb the steepest hill on high. In fact, we were pretty well all travelling more or less on high. Today the topic is needs, soil drifting and fall rye. When humanity gets dipping owing to prosperity, then nature provides the means to restore them back to normal again. What a wonderful mother nature is."

Dr. John H. Gillespie is leaving Pincher Creek.

Detroit's tax rate is \$20.66 per one thousand dollars.

The Winnipeg labor appeal will be heard by the privy council on July 21st.

Sir Lomar Gouin has resigned and Hon. L. A. Taschereau has been sworn in as premier of the province of Quebec.

The rule of the road changed in British Columbia today, July 15th, when cars and vehicles must turn to the right.

There are more wheels turning in America today than ever before, but 28,000,000 of them are automobile wheels.

Imports from Germany to Great Britain from February 1st to April 30th, totalled in value five and a half million pounds sterling.

Dr. R. K. Lillie returned last Saturday morning from Portland, Oregon, where he was one of seventy-five or eighty thousand visiting Shriner in convention.

The marriage of M—Alicia Cawthorne, of Bellevue, to Lionel Edward Drake, of Port Clements, formerly of Bellevue, was solemnized by Rev. J. P. Westman at Nelson last week.

Important changes are involved in new regulations under the migratory birds act, which has just been issued at Ottawa, under which the sportmen's bag of birds in Alberta has been limited to 30 ducks daily, 15 geese and 15 brants, the season's duck limit being 200 birds.

C. B. Barrell and family, of Ipswich, England, arrived here on Tuesday morning. Mrs. Barrell is a sister of Mrs. W. J. Howe, senior. Mr. Barrell hopes to locate in Blairmore.

Rev. W. F. Burns, pastor of Knox Presbyterian church, Lethbridge, while Rev. A. H. Brown was overseas, has been called to accept the pastorate of the United church at Fernie, left vacant by the resignation of Rev. Batzold.

The resignation of Sir Robert Borden as prime minister of Canada took effect on Saturday last. He will be succeeded by Hon. Arthur Meighen, minister of the interior, who has undertaken the formation of a new administration.

A pamphlet that will make old country folks homesick has been issued by the C. P. R. The title of the pamphlet is: "Old Country C. P. R. Guide to Great Britain" The pamphlet is all that the name implies and is comprehensive. It is full of actual photographs and piles of data compiled in an interesting manner.

An inexperienced young divine was officiating at his first funeral. Desiring to ask the congregation to step up and view the remains, in his nervousness he worded the invitation in this way:

"And now, dear friends, will you kindly pass around the bier."
Over all those drawn, gloomy faces in that vast edifice there spread such a look of mild, peaceful, happy expectation that the young clergyman, perceiving the error he had made, almost broke down.

Men are like worms—they just crawl along until some chicken picks them up.

No goods secured abroad are cheap that take the place of our own labor and raw material. Spend your money at home and help yourself.

Our rulers will best promote the improvement of the nation by strictly confining themselves to their legitimate duties, by leaving capital to find its lucrative course, commodities their fair price, industry and intelligence their natural reward, intemperance and folly their natural punishment, by preserving peace, by protecting property, by diminishing the price of law, and by observing economy in every department of the state. Let the government do this, the people will assuredly do the rest.—Lord Macaulay, 1830.

A motorist touring in a western state got stalled in a tenacious mudhole. While making a vain attempt to escape, a boy appeared with a team of horses.

"Haul you out, mister?"
"How much do you want?"
"Three dollars."

After a long and fruitless argument the motorist was pulled to dry land.

After handing over the money the motorist said:
"Do you haul many cars out in a day?"

"I have pulled out twelve to-day."
"Do you work nights too?"
"Yes, at night I haul the water for the mudhole."
